

Kevin Crowley

Senior Systems Engineer

 kevocrowley@gmail.com |  [LinkedIn Profile](#)

Professional Summary

Senior Systems Engineer with 25+ years of experience building and supporting enterprise infrastructure. Proven expertise in cloud migration, infrastructure automation, and platform engineering. Skilled in modern DevOps practices using Terraform, Ansible, and container orchestration. Strong background in both traditional data center operations and cloud-native solutions across Azure and AWS.

Core Technical Skills

Cloud Platforms: Azure, AWS, DigitalOcean

Infrastructure as Code: Terraform, Terragrunt, Ansible, Puppet

Container Orchestration: Kubernetes (EKS), Docker

Monitoring & Observability: Datadog, Elasticsearch/Kibana, Grafana, Nagios, Zabbix

Programming: Python, Bash scripting

Databases: RDS, MongoDB, ElastiCache, RabbitMQ, Kafka

Networking: Cisco, Juniper, DNS, IP routing, VLANs, Security

Storage: SAN, Fibre Channel, Dell, HP storage systems

CI/CD: GitHub Actions, Jenkins

Professional Experience

Site Reliability Engineer / Platform Engineer

February 2020 - Present

Travelport

- Architected and implemented modern platform infrastructure using EKS, RDS, MSK, and ElastiCache, replacing legacy EC2-based systems
- Infrastructure as Code for building and maintaining platform using Terraform, Terragrunt, and Ansible to support multiple development teams
- Established comprehensive observability stack with Datadog integration, PagerDuty

alerting, and Jira ticketing for 24/7 operations

- Built CI/CD pipelines using GitHub Actions, improving deployment efficiency and reliability
- Migrated legacy infrastructure to cloud-native solutions, reducing operational overhead and improving scalability

Senior Infrastructure Engineer

August 2019 - December 2019

Flogas

- Led critical infrastructure migration from on-premises to Azure cloud platform
- Designed and implemented network architecture using Cisco Meraki cloud infrastructure
- Documented migration procedures and implemented solutions for ongoing cloud adoption projects
- Delivered project on schedule within aggressive timeline constraints

Senior IT Infrastructure Engineer

February 2019 - July 2019

Takeda Pharmaceuticals

- Spearheaded greenfield data center build-out for new 24/7 manufacturing facility
- Designed and implemented complete infrastructure stack from compute and storage to applications
- Ensured high availability and disaster recovery solutions for critical manufacturing systems (OSI PI, MES, BAS, PAS)
- Established monitoring and capacity planning processes for production readiness by January 2020
- Created comprehensive SOPs for all IT infrastructure components

Senior Systems Engineer

October 2015 - January 2019

GTT (Formerly Hibernia Networks)

- Managed global infrastructure supporting 3,000+ users across 100+ ESXi hosts and multiple data centers
- Led London data center build-out project for critical CRM application, implementing bare metal, ESXi, and SAN solutions
- Administered Puppet infrastructure for production environment, developing custom modules and automating deployments
- Implemented comprehensive monitoring solution using Zabbix, Nagios, and Observium across all sites
- Established Git repository management and version control processes for development teams
- Managed major Sugar CRM upgrade on Ubuntu LAMP stack

Systems Engineer

September 2013 - October 2015

Beacon Hospital

- Managed infrastructure for 800+ users across 80+ servers in healthcare environment
- Successfully led Active Directory migration from Windows Server 2003 to 2008/2012 with high availability implementation
- Project managed enterprise-wide Windows XP to Windows 7 upgrade
- Expanded network infrastructure to remote sites using Juniper firewalls and Avaya switches
- Implemented WiFi infrastructure with Cisco 5508 controller and 50 access points
- Migrated email infrastructure in-house using Microsoft Exchange 2013

Contract and Permanent Roles

September 2005 - August 2013

Various Organizations

- Provided infrastructure support for diverse organizations including National Library of Ireland, Synovate, Toyota (Australia), Irish Life, and IFG Group
- Gained broad experience across different industries and technology stacks
- Developed expertise in both contract and permanent role environments

Education

Bachelor of Science in Software Development and Computer Networking

2002

Cork Institute of Technology

Certifications

- **CCNA** (Cisco Certified Network Associate)
- **MCSA 2003** (Microsoft Certified Systems Administrator)
- **MCSA 2000** (Microsoft Certified Systems Administrator)
- **RHCSA** (Red Hat Certified System Administrator)
